

Residence Life Solutions

Oregon Corrections Enterprises

$$n = c_0 \sqrt{\epsilon_r \mu_r}$$

$$\vec{S} = \vec{E} \times \vec{H}$$

$$\sin \alpha_{1G} = \frac{n_2}{n}$$

Introducing Solutions—to the Nth degree.

Being rough and active are youthful attributes. That's why university campuses are among the world's best places to test furniture durability. Students quickly find the weak points in their rooms, their lounges...and your annual maintenance budget too.

Our furniture was first tested in another rough-and-tumble environment—the state's correctional system. Universities, it seems, are even more demanding and we've built a reputation for quality that withstands the wear and tear of academic life.

The extra value built into our furniture comes from the use of better materials, almost all of which is from our region. Locally made also means lower cost and far less hassle. Ask about our easy no-bid process and you'll begin to understand how we make doing business easier from day one.

Clients find value in our service. **Solutions**—durable and efficient, installed professionally and on time. Always.

Brown can masquerade as beauty. Solutions 101 combines durability with comfort and aesthetic value.

Solutions 101™

Value comes first. It's elementary and top-of-mind with us.

So is sturdiness. We begin with choice hardwoods, cut mostly from NW timber. Tough plywood doors and cabinet walls are faced with light-colored ash veneers. Exceptionally crafted and quietly elegant. Fastened with brutish hardware that just doesn't fail.

All Solutions 101™ materials are tested for long wear, including fabrics. Our lounge seating has no springs to poke through and cushions stay true to form. Chairs and beds are comfortable, with ergonomic considerations. Students find our furnishings practical and homey, designed with their convenience—and feedback—in mind.

Of equal value: this 101 series is easily adaptable for different room settings. It's modular too, so you can field repair rather than replace it!

And, everything is guaranteed (presuming that it's not dropped to the parking lot from a third floor window—by mistake—of course!).

Solutions **Masters Series**[™]

If the university has a distinctive architectural style already, no problem. The **Masters Series** pairs fashion with function. Your choices here are limitless—color, materials, configuration and style, from historic to high tech.

With us, fresh ideas are as welcomed as is your collaboration. The Masters Series can be customized without it having a custom price tag and is manufactured precisely to Architectural Woodwork Institute standards.

The **Masters Series** is often more upscale but never less durable. Your design might combine metal and wood, for example—using cherry wood and satin-black metal to perpetuate a rich interior theme in residences, lounges, dining halls or libraries.

Many campuses seek to express their environmental values in the furnishings they buy. At the least, we guarantee that no rainforests have been sacrificed for our materials. At the other end of the spectrum, you can specify FSC certified woods and we'll be happy to comply.

"Things are going well. The moving crew is working very well and the general contractor is much impressed. The few minor things we have found during the punch list review have been addressed quickly. We are pleased."
